## SUMMARY

---

Highly motivated and dedicated entry-level Front End Developer with a passion for creating visually appealing and user-friendly websites. Proficient in HTML, CSS, and JavaScript, with a strong understanding of responsive web design and modern front end frameworks. Able to collaborate effectively with cross-functional teams to translate design concepts into functional code. Committed to staying up-to-date with the latest industry trends and technologies. Eager to contribute to a dynamic organization, utilizing my technical skills and creativity to deliver exceptional web experiences. Strong problem-solving abilities and a keen eye for detail, combined with excellent communication and time management skills. Ready to embark on a rewarding career in Front End Development and make a meaningful impact in the digital landscape.

## SKILLS

---

CSS, HTML, Wordpress, JavaScript, Figma, Computer Hardware, Analysis, Critical Thinking

## RELEVANT EXPERIENCE

---

### Correlation One

*Software Development Training Program*

**Remote**

*April 2023 - Present*

- Developed a solid understanding of HTML, CSS, and JavaScript through interactive online courses and coding exercises.
- Applied best practices in user interface (UI) and user experience (UX) design to create visually appealing and intuitive web interfaces.
- Practiced version control and collaboration using Git and GitHub, enabling effective teamwork and code management.
- Explored and utilized front-end development tools and frameworks, such as Bootstrap or Material-UI, to streamline development processes and enhance productivity.
- Solved case-based, business problems using real-world data
- Developed full-stack data fluency

## ADDITIONAL EXPERIENCE

---

### Amazon

*Inventory Control Quality Assurance / Learning Ambassador*

**Las Vegas**

*July 2021 - Present*

- Played a crucial role in ensuring the delivery of high-quality products and services by conducting thorough quality assurance testing on various Amazon software applications and platforms.
- Conducted testing by executing detailed test cases to identify item defects, conveyance issues, performance limitations, ensure compliance with quality standards
- Identified and reported discrepancies or anomalies in inventory records, promptly working with cross-functional teams to investigate and resolve issues
- Played a key role in training and mentoring new Quality Assurance team members, providing guidance on inventory control best practices, quality standards, and testing methods

### *Outbound Flow Operations*

- Monitored outbound flow operations to avoid and solve conveyance issues
  - Developed a strong sense of teamwork and effective communication skills by collaborating with cross-functional teams, including software developers, operations managers, and quality assurance testers.
  - Took initiative to help fellow warehouse workers understand and effectively use software tools, improving overall efficiency by guiding them through software documentation.
